- 1 Introduction
- 2 Understanding Randomness
- 3 Statistical Tests for Randomness
- 4 Human Randomness vs Computer Randomness
- 5 Random Numbers vs Pseudorandom Numbers
- 6 Introducing Encryption
- 7 Statistical Weakness of Simple Ciphers
- 8 The One-Time Pad
- 9 Shannon's Perfect Secrecy
- 10 Measuring Information Leakage
- 11 Main Experiment: Varying the Quality of Randomness
- 12 Random-Looking Does Not Always Mean Secure
- 13 Conclusion
